JISD's STEM Day Offers Students Path To Their Future

It becomes clearer each day that Science, Technology, Engineering and Math is the choice that offers students so many promising options for their future. But STEM Day is taking this a step further in offering kids hands-on learning in a variety of STEM fields. It's also a great opportunity for many of today's major cutting-edge tech companies are looking to build and sustain their future through bright and innovative people.

That's why Judson ISD and Congressman Henry Cuellar are working together to host the 4th Annual STEM Day on Saturday May 18, 2019. This will be an opportunity for students to participate in experiments and demonstrations of technology concepts. These activities are geared to help steer students to think outside the box and come up with totally new ideas or make old ones better.

This STEM Day hosted at Wagner High School will include some of the biggest names in science and technology. More than 40 STEM related organizations and businesses will be a part of this array of hands-on experiments and student exploration. Watch kids dive into stimulating and challenging activities and exhibits that will leave them thinking and imagining what's possible.

The event will be highlighted by special guest speaker **Congressman Henry Cuellar** and is **OPEN TO EVERYONE**. Whether you live inside or outside the JISD footprint, you are invited to join in the fun and the inspiration.

There will be plenty of activity with exhibits for students of all ages with plenty of visual elements for an engaging news feature.

What: STEM Day

Where: Wagner High School, 3000 North Foster Rd. San Antonio, TX 78244

When: Saturday, May 18, 2019 from 9 am to 2 pm.
