MONTH

Types of ADHD

1. INATTENTIVE

Students exhibit significant inattention in multiple areas without any hyperactivity or impulsivity.

2. HYPERACTIVITY

Student has control of attention but has significant hyperactivity deficits or problems with impulse control.

3. COMBINED

When student struggles with paying attention and regulating behavior, it is combined. This is the most common form of ADHD

ADHD IS ONE OF THE MOST COMMON NEURODEVELOPMENTAL DISORDERS.

ACCORDING TO THE ACADEMY OF PEDIATRICS, 8-10% OF SCHOOL AGE CHILDREN MEET CRITERIA TO BE DIAGNOSED WITH ADHD.
