### **"Scared Safe:" Parents and Families Preventing School Violence**

This conversational training targets parents, family members, and loved ones with students in K-12 schools to empower them in their ability to help in the mission to prevent targeted school violence. This raw and eye opening training addresses those factors about which parents must be aware that may signal a child is at risk for engaging in violence. Strategies as to how to have those challenging conversations with our children will be explored. Parents will be confronted with the pitfalls of overvaluation and labeling our youth as "special" to prevent the fostering of unhealthy esteem and narcissism that contributes to poor coping skills, entitlement, bullying, and in extreme cases, violence. Moreover, the training aims to dispel myths about what contributes to school violence and the hysteria of these incredibly rare events being perceived as an epidemic. Parents and families will leave feeling more equipped to engage threat assessment and violence prevention strategies in the home, the Mecca of first line defense for prevention.

### **Parenting the Love & Logic Way (1 Hour Lunch Break Provided)**

Love and Logic is an approach to raising children that provides loving support from parents while at the same time expecting children to be respectful and responsible. Love allows children to grow through their mistakes. Logic allows them to live with the consequences of their choices. Love and Logic is easy to use, raises responsible children, and changes lives. By attending this training, you will learn to use humor, hope, and empathy to build up your adult-child relationship, provide real limits in a loving way, and learn how to teach consequences and healthy decision-making.

### **Unorganized, Unfocused, and Unprepared: The Impact of Executive Functioning Skills in the Classroom**

Does your son or daughter have trouble organizing work, completing tasks, managing materials, managing time, paying attention or have social difficulties? These are all cognitive skills that are referred to as Executive Functioning Skills. Executive Functioning Skills greatly impact children's achievement and are often an associated feature of developmental or learning disabilities, or caused by a mismatch between a child's neuro-developmental stage and the demands of their environment. This training will focus on ways in which parents and teachers can use appropriate strategies to support children's developing executive skills, while helping improve academic performance.
